Public

Agenda

- Data Science: what is the hype all about?
- SAP's PoV on Data Science
- The Global Data Science Hub – Mission and Global Experience
- Q&A

DATA SCIENTIST

Sexiest Job of the 21st Century

Harvard Business Review: “Data Scientist: The Sexiest Job of the 21st Century” by Thomas H. Davenport and D.J. Patil

HOW ANALYTICS PROFESSIONALS DESCRIBE THEMSELVES

Transforming data into business value using math & algorithms

BIGGEST CHALLENGES

Deployment
Explaining Analytics
Dirty Data

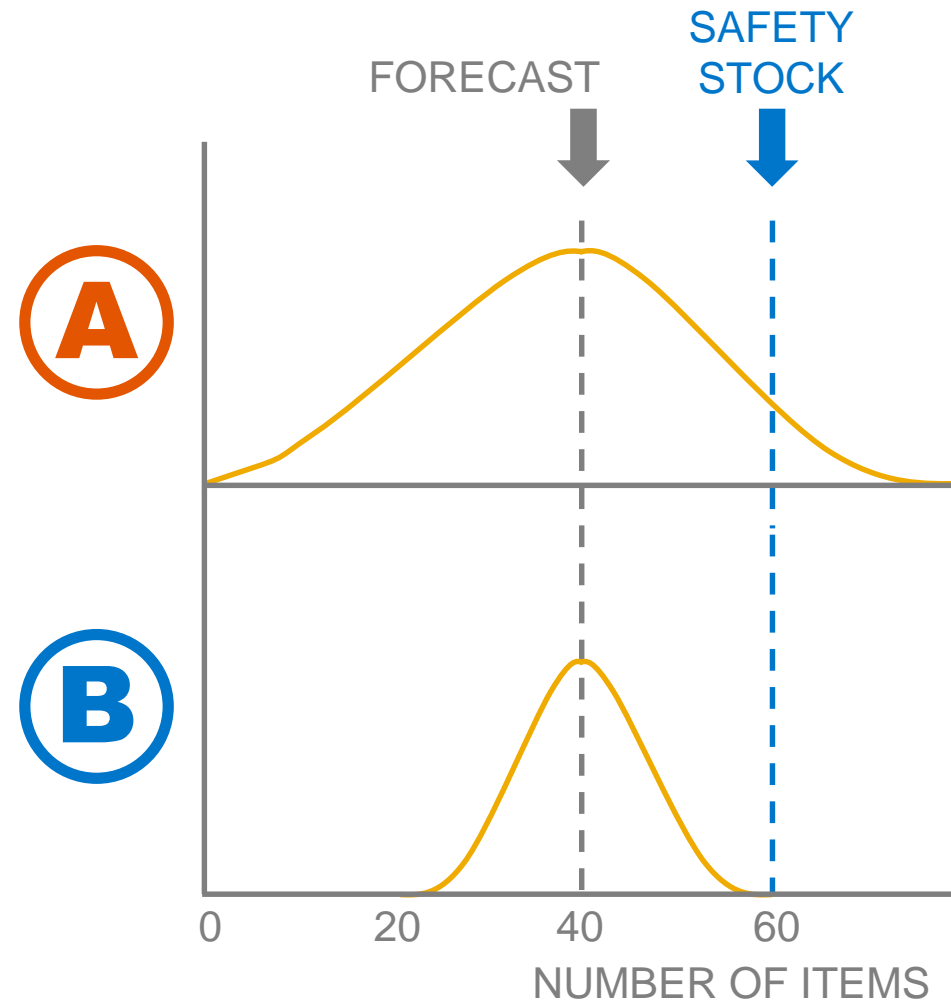

DATA SCIENCE LOOKS DEEPER

Sales of two new products six weeks after market introduction

DATA SCIENCE PLANS BETTER

Product sales at two stores

Solving Real World Problems

By Optimizing Resources and Improving Margins

- Churn Reduction
- Customer Acquisition
- Lead Scoring
- Product Recommendation
- Campaign Optimization
- Customer Segmentation
- Next Best Offer/Action

- Predictive Maintenance
- Load Forecasting
- Inventory/Demand Optimization
- Product Recommendation
- Price Optimization
- Manufacturing Process Opt.
- Quality Management
- Yield Management

- Fraud and Abuse Detection
- Claim Analysis
- Collection and Delinquency
- Credit Scoring
- Operational Risk Modeling
- Crime Threat
- Revenue and Loss Analysis

- Cash Flow and Forecasting
- Budgeting Simulation
- Profitability and Margin Analysis
- Financial Risk Modeling
- Employee Retention Modeling
- Succession Planning

- Life Sciences
- Health Care
- Media
- High Education
- Public Sector / Social Sciences
- Construction and Mining
- Travel and Hospitality
- Big Data and IoT

“We want people to do Data Mining without knowing they do Data Mining”

Machines can now do things that were not possible before

What is Machine Learning?

- Computers learn from **data** without being explicitly programmed
- Machines can see, read, listen, understand and interact

Why now?

- **Big data** (e.g. business networks, cloud applications, IoT and S/4HANA)
- Massive improvements in **hardware** (GPU, multicore)
- **Deep Learning** algorithms

Computer vision is approaching human abilities

DATA SCIENTIST

Sexiest Job of the
21st Century???

Harvard Business Review: “Data Scientist: The Sexiest Job of the 21st Century” by Thomas H. Davenport and D.J. Patil

The role of the Global Data Science Hub

Transforming data into business value using math and algorithms

Leading experts in 26 industries, 12 lines of business

Global data science team who know how to turn data into relevant insights

Help customer adoption of SAP technology

Customer focus with the experience to make innovation programs successful

Centralize global innovation knowledge produced

Provide input for next generation of SAP applications

Analyze Petabytes of Data to Predict thousands of manufacturing signals in real time in order to:

- Identify defective products earlier in the production cycle
- Improve product yield
- Reduce time to ramp-up new manufacturing processes
- Deliver > 10X Return on Investment

“Talk about finding the needle in the haystack. We culled through the trillion records in 14 seconds!”

-- Pat Buddenbaum, head of Intel's Data Center/Server group, speaking on Jeff Word's "The HANA Effect" podcast on November 5, 2015

Many Thanks!
