THE ROLE OF BUSINESS IN A DISRUPTED WORLD

The Fortune Greece CEO Initiative is a membership organization, bringing together CEOs that are committed to addressing business excellence, diversity, and major societal issues as a core part of their business strategies. Our annual meeting brings together members for collaborative discussions focused on the Initiative's core themes and the shared belief that infusing broader purpose into corporate strategies is increasingly important in attracting and motivating talent, deepening bonds with consumers, and steadying corporate reputation.

2022 ANNUAL MEETING

The world has undoubtedly entered a new age and is experiencing a tangled web of existential crises unlike any we've seen in decades. Russia's brazen invasion of Ukraine. Rising authoritarian tides. Political polarization. Diminished democratic institutions. Unbroken dependency on fossil fuels. Cataclysmic climate change projections. Deep distrust in capitalism. Raging culture wars.

The lingering battle with COVID-19 and fear of the next pandemic. Business leaders are feeling the pressure and more is being demanded of them than ever before. How are they expected to navigate these troubled waters? How does industry not only make profits but also a positive impact in an exceptionally difficult new global context? Fortune Greece CEO Initiative promises to confront these challenges head-on as we examine the role of business and leadership in a disrupted world.

2022 MAIN TOPICS

- ▶ Leadership perspectives from CEOs driving innovation and transformation
- ▶ Views from government officials and policymakers working across the aisle to drive economic prosperity
- ▶ Insights from subject matter experts on the key geopolitical and business trends
